

DEEPAK SAHU

+91 7974400824 — Deepak8962138240@gmail.com

Bengaluru, Karnataka — LinkedIn

FullStack Developer with 3+ years of experience in Spring Boot, Microservices, Hibernate, and AWS, Skilled in REST APIs, JWT, Kafka and CI/CD With Jenkins, Experienced in Agile(Scrum) using JIRA. Delivered scalable, secure, cloud-native systems with integrations like Stripe, SendGrid, and Twilio

TECHNICAL SKILLS

Programming Languages: Java, Spring Boot, Spring MVC, Spring Security, Spring Cloud, Hibernate(JPA), Feign Client, RESTful APIs, Microservices Architecture, TypeScript, JavaScript
Front-end: Angular, React, Redux, Redux Toolkit, Tailwind, Bootstrap Material UI, ShadCN UI, Google Search Console.
Database & Cache: MySQL, ER Diagrams, Redis Cache
Cloud & DevOps: AWS (EC2, S3, IAM), Docker, Kubernetes (EKS), Terraform, Jenkins CI/CD, GitHub Actions, Git etc.
Messaging & Communication: Apache Kafka, REST API, Feign Client for communication in microservices, Eureka Server, API Gateway etc.
Tools & Libraries: Jira, Postman, Swagger, IntelliJ IDEA, STS, Maven, Git, GitHub, Stripe
Monitoring & Logging: SLF4J, Logback, Zipkin, Spring Boot Admin, ELK
Development Process: Agile Methodology(Scrum)-Spring Planning Daily Stand-ups, Retrospectives

EXPERIENCE

Advika Pvt. Ltd.

Software Developer

Jul 2024 – Present

Gwalior, India

- Built a scalable e-commerce platform for [prithu.earth](#), Collaborated with 10+ engineers to develop an Employee Management System... Developed RESTful APIs using Node.js and Express.js handling 100,000+ daily requests....
- Collaborate with 10+ engineers to develop [Employee Management System](#), a cloud RDBMS that digitizes the full employee lifecycle from recruitment to performance appraisals, improving HR workflows by 40%.
- Develop RESTful APIs with java and Spring Boot that process 100,000+ daily requests with sub-200 ms response times.

PNINFOSYS

Intern

Jul 2022 – Dec 2022

Gwalior, India

- Fixed over 50 major bugs and accelerated development cycles by 20%.
- Delivered 12+ production releases in 7 months using React.js and Node.js while lowering bug rates by 25%.
- Secured application data with robust input validation and protection against XSS and SQL injection.
- Reviewed 100+ pull requests to uphold high code quality and design standards.
- Created a reusable component library used across 8 projects, saving over 200 engineering hours.

PROJECTS

prithu.earth – Digital Agriculture Platform | React, java, Hibernate, SpringBoot, Apache Kafka Microservices

[Live](#)

- Enable doctor and dietitian consultations to support patient communication throughout the healthcare journey.
- Build dashboards for providers to monitor patient progress and trigger personalized interventions.
- Improve treatment adherence through medication reminders, refill alerts, and reward-based learning.

Dr. Morepen Pharmacy | Node.js, TypeScript, Redis, MongoDB, Tailwind, Razorpay

[Live](#)

- Integrated real-time communication using WebSockets, Server-Sent Events (SSE), and chat systems to enable live order updates, notifications, and seamless user interaction.
- Implemented secure document upload and storage for prescriptions, ensuring compliant data handling across India.
- Integrated Razorpay for seamless nationwide payments with transparent pricing and real-time order tracking.
- Optimized nationwide logistics architecture to handle doorstep delivery for millions of wellness products.

Multi-LLM Ai Chat Platform | React.js, TypeScript, OpenAI, Claude, Gemini, Ollama

Jul 2024

- Designed a modular frontend architecture integrating multiple AI models through a unified interface.
- Implemented intelligent API routing and fallback mechanisms to ensure high availability.

EDUCATION

Govt Vrinda Sahay College)

Bachelor of Commerce in Informatics Practices (Minor in It and software)

2019 – 2022

GPA: 6.4/10
